

Since its founding in 1991, Momentum Microsystems, Inc. has been a leading provider of integrated, turn-key computing solutions for the Biotech Industry. We work closely with our customers, applying our expertise in systems integration and network systems engineering to help them deploy complex software and hardware products.

LOGISTICS

Our logistics process involves:

- Integration
- Transportation
- Inventory
- EOL
- Warehousing
- Material handling
- Packaging

The operating responsibility of our logistics management program is to plan, implement and control an efficient and effective forward and reverse flow of goods, services and related information between the point of origin and the point of consumption in order to meet customers' requirement.

INTEGRATION

Our "on demand" customer-driven manufacturing process is as integrated end-to-end process with very strong logistics and supply management capabilities.

Our commitment is to plan and execute a process that improves performance through an integrated model. Momentum can respond to changes in the market conditions faster than traditional supply chain. We use real time information to sense shifts and redirect resources.

OEM

Our OEM program is designed to allow our customers to free their resources and focus on their strategies. In the bundled OEM segment we provide contract manufacturing and operate a production facility capable of conducting worldwide deployment.

Customized build and integration:

- Reconfiguration to meet BOM requirements
- Create, install and test custom image
- Assemble kits
- Package and palletize product
- First article testing and approval
- Custom labeling
- Worldwide shipment

Momentum Microsystems is committed to the SLAs of our customers. Our objective is to ensure that the final end user has the **right product** at the **right time** with the **highest quality** of customer service.

MANUFACTURING

Our manufacturing process includes:

- Sub-Assemblies: Light assembly, final configuration, asset tagging, packaging, promotional material insertion and kitting.
- Pick and Pack: Custom Packaging and Drop Shipping, seamless representation to The End User's Customers
- Returns Management: Returned merchandise is managed in accordance with established operating procedures.

SERVICES

Momentum Microsystems is a multi-platform provider of IT infrastructure products and services. We offer a smart set of solutions designed to simplify your enterprise infrastructure through:

- Consolidation and virtualization
- Disaster recovery and business continuity
- Storage services and solutions
- End-user services: Images, rollouts, remote and mobile users
- Maintenance and technical support
